

FOR IMMEDIATE RELEASE

Intelligent Environments Appointed As Distributor of CommandFusion Hardware in New Zealand

CommandFusion appoint Intelligent Environments Limited as exclusive distributor of their automation and control hardware range covering the region of New Zealand.

Auckland, New Zealand — 18 May 2015

Intelligent Environments Limited (IEL) have been appointed as a distributor of CommandFusion hardware covering the region of New Zealand. IEL believe that Command Fusion automation and control products will be well accepted in the AV market due to their flexibility and innovative solutions.

CommandFusion director Jarrod Bell believes that the appointment of a new distributor in New Zealand is an important step for the company. He says it will make CommandFusion products much more accessible to the existing NZ customer base by providing localised stock and high quality support and training services.

“We are excited about the role CommandFusion can play in commercial lighting control, it will allow us to quickly and easily add a friendly interface and scheduling system to products that traditionally lack these features.” said Paul Harris, General Manager at Intelligent Environments

With affordability and a modular, open framework at its core, the CommandFusion hardware range has proven a cost effective and simple way for integrators to provide a reliable automation and control solution. Since being released in 2012, its popularity amongst integrators has been steadily growing. The hardware revolves around a modular

design ensuring that all system sizes from a single room up to an entire campus are cost effective and suited to any unique requirements. Already successful in the home automation industry, the hardware range has allowed CommandFusion to quickly gain ground in the commercial and industrial automation and control sectors. CommandFusion believes in openness: software and hardware protocols are fully published - allowing integrators to mix control systems within a job to suit their requirements and budgets.

About CommandFusion

CommandFusion is a designer of powerful, cost effective automation and control software and hardware. Emphasizing reliability and interoperability, all hardware and software uses openly documented protocols to allow for ease of integration with other systems.

Founded in Melbourne, Australia in 2005, CommandFusion has been selling its flagship software product (iViewer) for iOS since 2008. Renowned for its flexibility and versatility, iViewer is now available for both iOS and Android platforms. The first CommandFusion hardware products were released in 2012. With a small, dynamic and driven international team coming from the automation, software and hardware fields, CommandFusion strives to offer the best support and fastest innovation turnaround in the industry.

About Intelligent Environments Limited

100% kiwi owned and operated, Intelligent Environments was established in 2007 by Paul and Nikki Harris. Despite the challenge of the economic downturn, the company has grown to become a leading player in the design and installation of residential and commercial control systems.

Paul Harris is well known and respected in the industry, with many years of experience on the management teams of leading manufacturers/suppliers of energy management and home automation systems.

CommandFusion Automation Hardware is available in New Zealand from Intelligent Environments Limited.
